PROJECTS

SmartMath Automation— *GitHub* — 09/2026

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, ChromeDriver
- **Project Overview:**Automated the testing of the SmartMath web application using Selenium WebDriver and Java. Created and maintained test scripts for login functionality, form validation, and key user workflows using the Page Object Model (POM). Used TestNG for test execution and Maven for project management, supporting efficient regression and functional testing.
- **Role:** QA Automation Engineer

TrackoBus— *GitHub* — 03/2026 – 08/2026

- **Technologies:** React Native, Spring Boot, WebSockets, PostgreSQL, PostGIS, Postman, Jira, Docker
- **Project Overview:** Community-powered real-time bus tracking mobile application utilizing crowdsourced location data. Executed manual functional, regression, and smoke tests across mobile interfaces, designed test scenarios to validate real-time location sharing and ETA calculations, validated RESTful APIs and WebSockets using Postman, and tracked and reported defects using Jira.
- **Role:**QA Tester, UI/UX Designer, Frontend Developer, Backend Developer

Crystal Clear Beauty— *GitHub* — 11/2025 – 06/2026

- **Technologies:** React.js, Node.js, Express.js, RESTful APIs, MongoDB, Supabase, Postman, Docker
- **Project Overview:** Full-stack E-Commerce platform featuring secure authentication, product management, and order workflows. Designed and executed test cases for user authentication and checkout, performed functional testing on

shopping cart workflows, validated RESTful API endpoints using Postman, and conducted regression testing during containerized deployments.
- **Role:**QA Tester, Full Stack Developer

BizPulse— *GitHub* 10/2026 – Present

- **Technologies:** Python, CrewAI, Google Gemini API, GitHub Actions, SMTP
- **Project Overview:** Developed an automated financial intelligence platform that aggregates real-time market data and business news, analyzes and prioritizes key market impacts using a multi-agent AI architecture, and generates executive morning briefings. Implemented automated daily workflows, report generation, and email delivery using GitHub Actions to ensure reliable and consistent execution.
- **Role:** AI/Software Developer
